

HARRISON'S

FAUNA FLORA™

A naturally occurring, high-potency nutritional digestive aid. A blend of organic live enzymes for animal health.

USE ORALLY FOR:

- Diabetes
- Irritable bowel syndrome
- Malnutrition
- Malabsorption syndrome
- Pancreatitis
- Wound management
- Sour crop (birds)
- Bacterial infections
- Failure to thrive
- Geriatric animals

BENEFITS

- Promotes proper absorption of nutrients from food.
- Regulates normal blood sugar levels.
- High in alpha lipoic acid (ALA).
- Stimulates immune system, including increased T-cell production.
- May be used for animals with malabsorption syndrome and chronic pancreatitis.
- Contains beta-1,3 glucans, which have been shown to be capable of lowering LDL cholesterol levels, assisting in the healing of wounds and aiding in the prevention of infections.
- Is safe and effective for all species (dogs, cats, all mammals, birds, reptiles and other exotic animals).
