

THE BULLETIN BIRD

HARRISON'S BIRD FOODS NEWSLETTER

Behind the Scenes...

Harrison's Bird Foods uses air movement and pneumatic trucks to transfer grains and flours during the various steps of food production. This process provides protection for fragile grains and avoids the risk of metal contamination from chains, augers or buckets.

You May Not Know...

Harrison's produces your bird's food using a fixed formula. That means we do not alter the ingredients based on ingredient cost or availability. We seek out the best certified organic, non-GMO-verified ingredients to maintain the exact same formula for each batch.

An Interesting Tidbit...

Products that contain at least 70 percent organic ingredients are allowed to say on their label, "Made with organic ingredients," but they may not use the USDA Organic seal. Look for this seal on the foods you buy for yourself and your pets.

A Brief Focus On...

Bird Bread - Just a reminder that Harrison's Bird Foods offers a certified organic mix for home preparation of bird food. The Bird Bread mix is available in two flavors: Original and Omega. After baking, the bread may be used as a tasty treat, assist in converting birds to a formulated diet, be hidden as a foraging reward, or used as a vehicle for administering medications.
