

# THE BULLETIN BIRD

OCTOBER 2024

HARRISON'S BIRD FOODS NEWSLETTER

## Behind the Scenes...

Feathers of the Future – HBD's Student Ambassador Program. Harrison's Bird Foods is thrilled to announce the expansion of its Veterinary Student Ambassador Program for the 2024-2025 academic year. Dr. Kaitlyn Nikirk has successfully recruited a diverse group of students from various veterinary schools across the United States, creating an exciting platform for educating future veterinarians about the importance of nutrition in avian health and wellness. The program now includes students from schools nationwide. Each ambassador will represent Harrison's Bird Foods at their respective universities, sharing knowledge on avian health and the benefits of organic nutrition in bird care. Ambassadors will also promote the values of Harrison's Bird Foods, including sustainability and scientific integrity.

Veterinary schools that are not yet part of the Student Ambassador Program may contact [nikirk.dvm@gmail.com](mailto:nikirk.dvm@gmail.com) for inclusion.

## Another Interesting Tidbit

Harrison's Bird Food's Handbook for a Healthy Bird has been fully translated into French, Chinese and Japanese, and translations are underway for veterinarians and owners of pet birds who speak other languages.

You May Not Know...

When you poison anything, including weeds & grass - it just moves up the chain  
**STOP USING POISON!!**
